Paint Driers

Manage the drying process of each layer of alkyd paint coatings!

You can achieve the desired drying performance for solvent-based alkyd paints by using our ProDry brand surface, through, and auxiliary driers in appropriate proportions in your formulations. We offer our products with various metal percentages, different solvent types, and acid options to your service.

ProDry Cobalt,

ProDry Manganese,

ProDry Iron,

ProDry Lead,

ProDry Zirconium,

ProDry Bismuth,

ProDry Calcium,

ProDry Barium,

ProDry Zinc,

ProDry Copper,

ProDry Strontium,

ProDry Potassium,

Ink Driers

Efficient Drying, Secure Printing

Our high-performance dryers optimize your printing processes by drying your inks quickly and effectively without compromising on quality. Thanks to the strong performance, fast and effective results of our ink dryers, we are your reliable partner for all your printing projects.

ProDry Cobalt

ProDry Manganese

UPR Accelerators

Optimum Curing

Our ProCat UPR Accelerators optimize the curing processes of polyester resins hence enhance the durability of your products. Our accelerators providing excellent performance even in challenging conditions, help build a strong foundation for your industrial applications.

ProCat Cobalt, ProCat Potassium, ProCat Copper

Metal-based Polyurethane Catalysts

Environmentally Friendly, Reliable Solutions

Our metal-containing polyurethane catalyst groups, produced to meet evolving technology and industry needs, stand out with their high performance and environmentally friendly features
